Minibus Description

If you're a Community Transport Operator or a Minibus Driver/Operator seeking a PSV-ready, zero-emission solution, Minibus World is proud to present the Maxus eDELIVER 13 Shuttle — a newly converted 2023, 23-plate Maxus eDELIVER 9, transformed into a 13-seat electric minibus. This low-mileage vehicle offers substantial savings compared to buying new, while delivering the confidence of a nearly-new model that leads the way in eco-conscious transport.

Purpose-built for hire and reward use, the Maxus eDELIVER 13 Shuttle is ideal for transporting larger groups efficiently and comfortably. Whether for daily commutes, group outings, or special events, this minibus offers a cost-effective alternative to managing multiple vehicles. With its spacious interior, high-powered EV drivetrain, and thoughtful engineering, the Maxus eDELIVER 9 is the perfect donor vehicle — reliable, modern, and great value.

At Minibus World, building vehicles like this 13-seater is second nature. Every model benefits from 'The Car Van and Minibus World Advantage', which includes premium touches such as floor-to-ceiling carpeting, enhanced soundproofing and insulation, additional storage, and upgraded safety features.

This vehicle may also be driven on a standard car driving licence, provided certain conditions are met. We recommend speaking with our sales team for guidance, as it remains the driver's responsibility to ensure they are legally entitled to operate the vehicle.

To give you complete peace of mind, this minibus comes with the balance of several warranties: a 5-year/60,000-mile general warranty, an 8-year/100,000-mile battery warranty, a 3-year paintwork warranty, and a 10-year anti-corrosion warranty. It also includes the remainder of a 5-year Maxus Assistance package, provided by RAC, which offers 24/7 roadside support and recovery to the nearest Maxus dealership across the UK, including Northern Ireland. In addition, a 2-year conversion warranty is included to further reinforce your confidence in this exceptional vehicle
